Reflexión:

The screenshot displays a GitHub Actions workflow run for the repository 'ingesoft5 / Taller1-CICD-g5-A00378149'. The workflow is titled 'CICD Pipeline - Product Application' and is identified by the run ID '33903543114'. It was triggered by a push to the 'main' branch by user 'SantiagoSantacruz57' 4 minutes ago. The overall status is 'Failure' with a total duration of '3m 52s' and 3 artifacts.

The workflow diagram, labeled 'ci-cd.yml', shows three steps: 'Backend Unit Tests & Package' (50s), 'Build Multi-Stage Docker Images' (1m 35s), and 'Compose Up & Smoke Testing' (1m 20s). The first two steps are successful, while the third step has failed.

The 'Annotations' section indicates '1 error and 3 warnings'. The error for 'Compose Up & Smoke Testing' is 'Process completed with exit code 56.'. The warnings for 'Frontend Lint & Build' and 'Backend Unit Tests & Package' state that 'Node.js 20 is deprecated' and that actions are being forced to run on Node.js 20.

On the left sidebar, the 'Summary' tab is active, showing a list of jobs: 'Backend Unit Tests & Package' (success), 'Frontend Lint & Build' (success), 'Build Multi-Stage Docker Images' (success), and 'Compose Up & Smoke Testing' (failure). Below this, there are links for 'Run details', 'Usage', and 'Workflow file'.
